

HARIHARAN S

Full Stack Developer | Python Django Backend · React Frontend | 3+ Years Experience

+91 7994052636 | hariharan66461@gmail.com | linkedin.com/in/hariharan-s-794064277 | Palakkad, Kerala

PROFILE SUMMARY

Results-driven Full Stack Developer with 3+ years of professional experience building scalable web applications, REST APIs, and modern frontend interfaces. Proficient in Python Django backend development and React frontend development, with hands-on experience delivering complete end-to-end solutions. Proven track record leading backend and full-stack development for service-based and product-based applications including a healthcare caregiver platform and a face-recognition-based gym management system. Expertise in Django REST Framework, PostgreSQL, React.js, Firebase Cloud Messaging (FCM), payment gateway integration, and location-based services. Experienced in team leadership, Agile workflows, and delivering high-quality solutions within deadlines.

WORK EXPERIENCE

Full Stack Developer (Team Lead)

march 2023 – Present

Techfiffo Innovations LLP, Palakkad, Kerala

- Led full stack development for two major client projects, coordinating frontend (React) and backend (Django) teams.
- Designed and developed RESTful APIs using Django REST Framework for mobile and web clients.
- Built responsive React frontends including admin dashboards, booking flows, and analytics panels.
- Implemented secure authentication, JWT token management, and role-based access control (RBAC).
- Managed PostgreSQL/MySQL databases — schema design, query optimization, and migrations.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications.
- Handled third-party integrations: payment gateways, Google Maps API, WhatsApp & email notifications.
- Collaborated in Agile sprints, conducted code reviews, and mentored junior developers.
- Deployed applications on cloud servers and managed production environments.

KEY PROJECTS

1) Qliq Care – Healthcare Caregiver Booking Application | Service-Based

Role: Full Stack Developer (Team Lead) | Tech: Python, Django, DRF, React.js, PostgreSQL, FCM, Payment Gateway, Google Maps API

- Built complete full stack solution — Django REST APIs on the backend, React web dashboard on the frontend.
- Developed caregiver booking system with real-time availability, booking confirmation, and live status updates.
- Implemented real-time location tracking using Google Maps API to display nearby caregivers on an interactive map.
- Integrated payment gateway for secure in-app caregiver booking payments.
- Configured Firebase Cloud Messaging (FCM) for push notifications (booking alerts, status updates, reminders).
- Designed and enforced roles and permissions system: Users, Caregivers, and Admins.
- Built caregiver reassignment functionality allowing admins to reassign bookings dynamically.
- Developed React-based admin dashboard for managing users, caregivers, bookings, and platform analytics.

2) Gym Management Software – Face Recognition-Based Attendance | Product-Based

Role: Project Manager & Full Stack Developer | Tech: Python, Django, DRF, React.js, PostgreSQL, OpenCV/DeepFace, Bootstrap

- Managed the full project lifecycle — requirements gathering, sprint planning, delivery, and client communication.
- Built face recognition-based check-in/check-out system for automated gym attendance marking.
- Developed React-based staff and admin interface for member management and real-time attendance views.
- Implemented member management module: add/update/deactivate members, manage membership plans and renewals.
- Built fee management module with automated due date tracking, payment recording, and overdue alerts.
- Designed role-based access for Gym Admins, Staff, and Members with secure API endpoints.
- Integrated face detection and recognition pipeline using OpenCV/DeepFace for real-time member identification.
- Built React analytics dashboard for tracking attendance trends, revenue, and membership statistics.

OTHER PROJECTS

- Successfully completed 10+ small and medium-scale full stack projects.
- Built web applications, management systems, and APIs for various use cases using Django + React.
- Gained hands-on experience in real-world problem solving and client requirements.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript (basic), SQL

Backend: Django, Django REST Framework (DRF), Flask (basic)

Frontend: React.js, Redux, React Router, Axios, HTML5, CSS3, Bootstrap, Tailwind CSS

Databases: PostgreSQL, MySQL, SQLite

APIs & Integrations: RESTful APIs, FCM (Firebase), Payment Gateways, Google Maps API, WhatsApp API

AI / ML Libraries: OpenCV, DeepFace (Face Recognition)

DevOps & Tools: Git, GitHub, Docker, Postman, VS Code, PyCharm, Linux

Core Concepts: OOP, MVC/MVT Architecture, ORM, JWT Auth, RBAC, Agile/Scrum, CI/CD basics

EDUCATION

Bachelor of Computer Applications (BCA)

2020 – 2024

Calicut University

Higher Secondary Education

2018 – 2020

Kerala State Board

ACHIEVEMENTS

- Led full stack development and project management for 2 major production applications serving real end-users.
- Delivered end-to-end caregiver booking platform with live payment, location-tracking, and React admin dashboard.
- Built and deployed a face-recognition-based product (Gym Software) as both Project Manager and core developer.
- Improved API response times through query optimization and efficient ORM usage in Django.
- Contributed to digitizing and automating workflows for healthcare and fitness industry clients using full stack technologies.
